

ABUS WIRELESS VIDEO INTERCOM SET

ID: LSC TVAC80020

RRP \$478.40 Set cost

Overview

The ABUS TVAC80020 video intercom consists of a door station including a video camera and a 3.5" monitor, both connected wirelessly. What could be easier?

installed).

This intercom is a simple solution for making your front door safer and more convenient. You can see who is at the door, speak with the person, and then operate the electric door release to let them in (if installed). This spares you unpleasant surprises and unwanted guests. The ABUS wireless intercom will also record who has called by while you are away. Video is stored to an SD card for easy viewing on the wireless monitor or PC.

Operation in few easy steps

1. Pressing the doorbell activates the portable monitor (live screen and recording)
2. You can view the video image on the monitor then talk to the caller
3. You can open the door by simply pressing a button on the monitor
4. The image is recorded automatically for viewing at a later stage

The door station should be mounted in a protected outdoor area (protection class IP55) and can be connected to existing cables (doorbell, door lock) if required. This makes the door station optimal for retrofitting existing buildings. The monitor operates on batteries and can be used anywhere within the wireless range.

In addition to the door station and monitor, the scope of delivery includes everything you need for retrofitting a house or apartment. Including power supply units, cable leads, screws, wall plugs, and screwdriver.
