

Carbine Electronic Digital Lock

ID: LK CDL-SL8SS
Price \$160.00 + GST

The carbine digital product was designed to target the residential market. We saw a great need in the market for a quality, reliable digital door lock that was very easy to install at a reasonable price.

The product is manufactured by the same factory as our Carbine lockset ranges and has been tested to world standards by them.

We are offering a free display block mount for this lock with any purchase of 3 locks (CDL-DB1)

Main Features:

- Key override cylinder – LKW5 (C4) keyway, 6 pin cylinder keyed to a 5 pin key (handle will not accept a PD cylinder unless you ream the cylinder hole and take a 1mm of the very base of the pinning chamber above the castellated nut)
- Easily rekeyed (outside lever comes off like a normal lockset)
- Retro Fits in standard 54mm lockset holes – no extra drilling required!
- Field changeable handing by simply pushing a button
- Adjustable 60/70mm tie-bolt latch
- Suits 32mm-51mm door thickness
- Lever styled same as Carbine SL8000 model
- Tested for 400,000 cycles, also moisture & salt spray tested
- The Carbine digital lock has been tested according to ANSI/BHMA A156.25-2002

American National Standard for Electrified Locking Devices Products. This includes materials, functions, strength & cycle testing

- Rain spray testing (1 hour at 2.5mm per minute)
- Plus Salt Spray testing (96 hours)
- Passage mode via internal turn button
- 4 x AA batteries
- Battery life = 50,000 cycles
- Low battery warning
- Master / User codes
- Changeable code length (4-8 digits)
