

Kwikset Kevo Bluetooth Deadbolt

Make: Kwikset

Type: Digital Locks, Electronic Digital Locks

Kevo is a new type of Electronic Deadbolt that uses the latest Bluetooth technology to enable the consumer to use a compatible Smartphone or included FOB as a Key. The functionality is similar to automotive Passive Keyless Entry (PKE) systems which allow the user unlock the door without needing to take a key out.

Kevo is easy to install, program, and use and operates on 4 AA batteries.

Features:

- Touch to unlock or lock. Easy access via Smartphone or
- Grant access to others via their Smartphone with complete control
- No Smartphone no problem, just issue FOBs to your guest or young children
- Easily manage FOBs with your Smartphone directly through the Kevo app
- Status LED ring provides user with authentication status and Lock Low Battery alert
- Easy Install, fits all standard door applications

With Kevo, your Smartphone is now your key. Simply keep your phone in your pocket or purse and just touch then lock to open. No matter where you are -work, vacation, or on the road, you can remotely provide temporary access to those who need it. Kevo also works with a traditional key and features SmartKey® re-key technology. With SmartKey you can re-key your lock yourself in 3 easy steps, offering the highest level of security and convenience. After 67 years of home security innovations, millions of families rely on Kwikset for peace of mind. Kwikset's long-time leadership and advancements in residential door lock security have now been enhanced with secure authentication technology. Resulting in Kevo—engineered for both maximum security and performance.

Superior Security

Electronic: Multiple levels of military grade PKI encryption.

Positioning Technology: Kevo can determine if you are inside or outside the door to help prevent unauthorised entry.

SmartKey Deadbolt Cylinder: Passes the most stringent lock picking standard UL 437, par 11.6, and includes BumpGuard™ to prevent lock bumping.

Send eKeys via Smartphone: Send an electronic key (eKey) to family, friends, or visitors who have a compatible smartphone so they can use their phone as a key too.

User Tracking: Track who locked or unlocked Kevo, who sent or accepted an eKey, which eKey/User was enabled, disabled, or was deleted from Kevo.

Your Smartphone is Now Your Key

Keep your phone in your pocket or purse. No more fumbling for your keys... just touch the lock to open for the ultimate in convenience.

The Kevo Mobile App Turns Your Smartphone into a Key!

- Free download from compatible smartphone app stores
- Use for initial setup
- Send, disable, and delete eKeys
- View history of smart lock activity
- Setup other configurable features and options
- Runs in the background on your device so there is no need to open the app to enter your home

Use eKeys to Manage Access to Your Home!

- An eKey is an encrypted electronic key
- Move your physical key into the digital world
- Improve your home access experience
- Enjoy the security and convenience of complete eKey management

No Smartphone? Use the Key Fob!

- Keep your Fob in your pocket, purse or backpack
- Enjoy the same Touch to Open convenience
- Single cylinder deadbolt version
- Fob is pre-enrolled so no additional setup is required
- Additional Fobs are available
