

Codelock Mechanical 500 Series

Product ID: LK CL515SSAU

This model is the 515 and its features include:

- Outside operation via punching in the correct digital code, inside function is a free lever at all times
- Outside lever has a slipping clutch to avoid damage to the mechanism if forced
- Non handed
- For door thicknesses of between 32mm - 65mm
- Easy code change as often as required by removing keypad from the door
- "Code Free" feature enables the digital lock to be used in a passage function. By enabling this feature, access through the door can be gained without the use of the digital code. The "Code Free" feature can then be reset back into a lock or standard function by the operator at any stage
- Latch is a 60mm tubular design with a 70mm option available as an extra
- Weather resistant, low maintenance finish
- Available in a stainless steel finish

These locks are not suitable for high use doors. Please contact your sales representative for advice on the correct locks for high usage installation.
